HEXAGONAL PENDANT LIGHT

A D A M L A M P

Hexa Hs2

The lamps are meant to be hung from the ceiling, for indoor use mainly. Each form is designed digitally, assembled afterwards. Each lamp is assembled in a unique way. The shapes are made of thin 0,3 translucent plastic, thus their weight is very little, around 0,5-1 kg. Despite the softness of the material, the structure, which is a hexagonal system, creates a firm, even form. At the intersections of the hexagons the elements display star-like shapes, which combine together and overlap, thus a very interesting surface structure is achieved.

Diffused light that provides good general light in the room.
